

Urban Paving

EH Smith
Architectural Solutions

VISITOR PAVILION

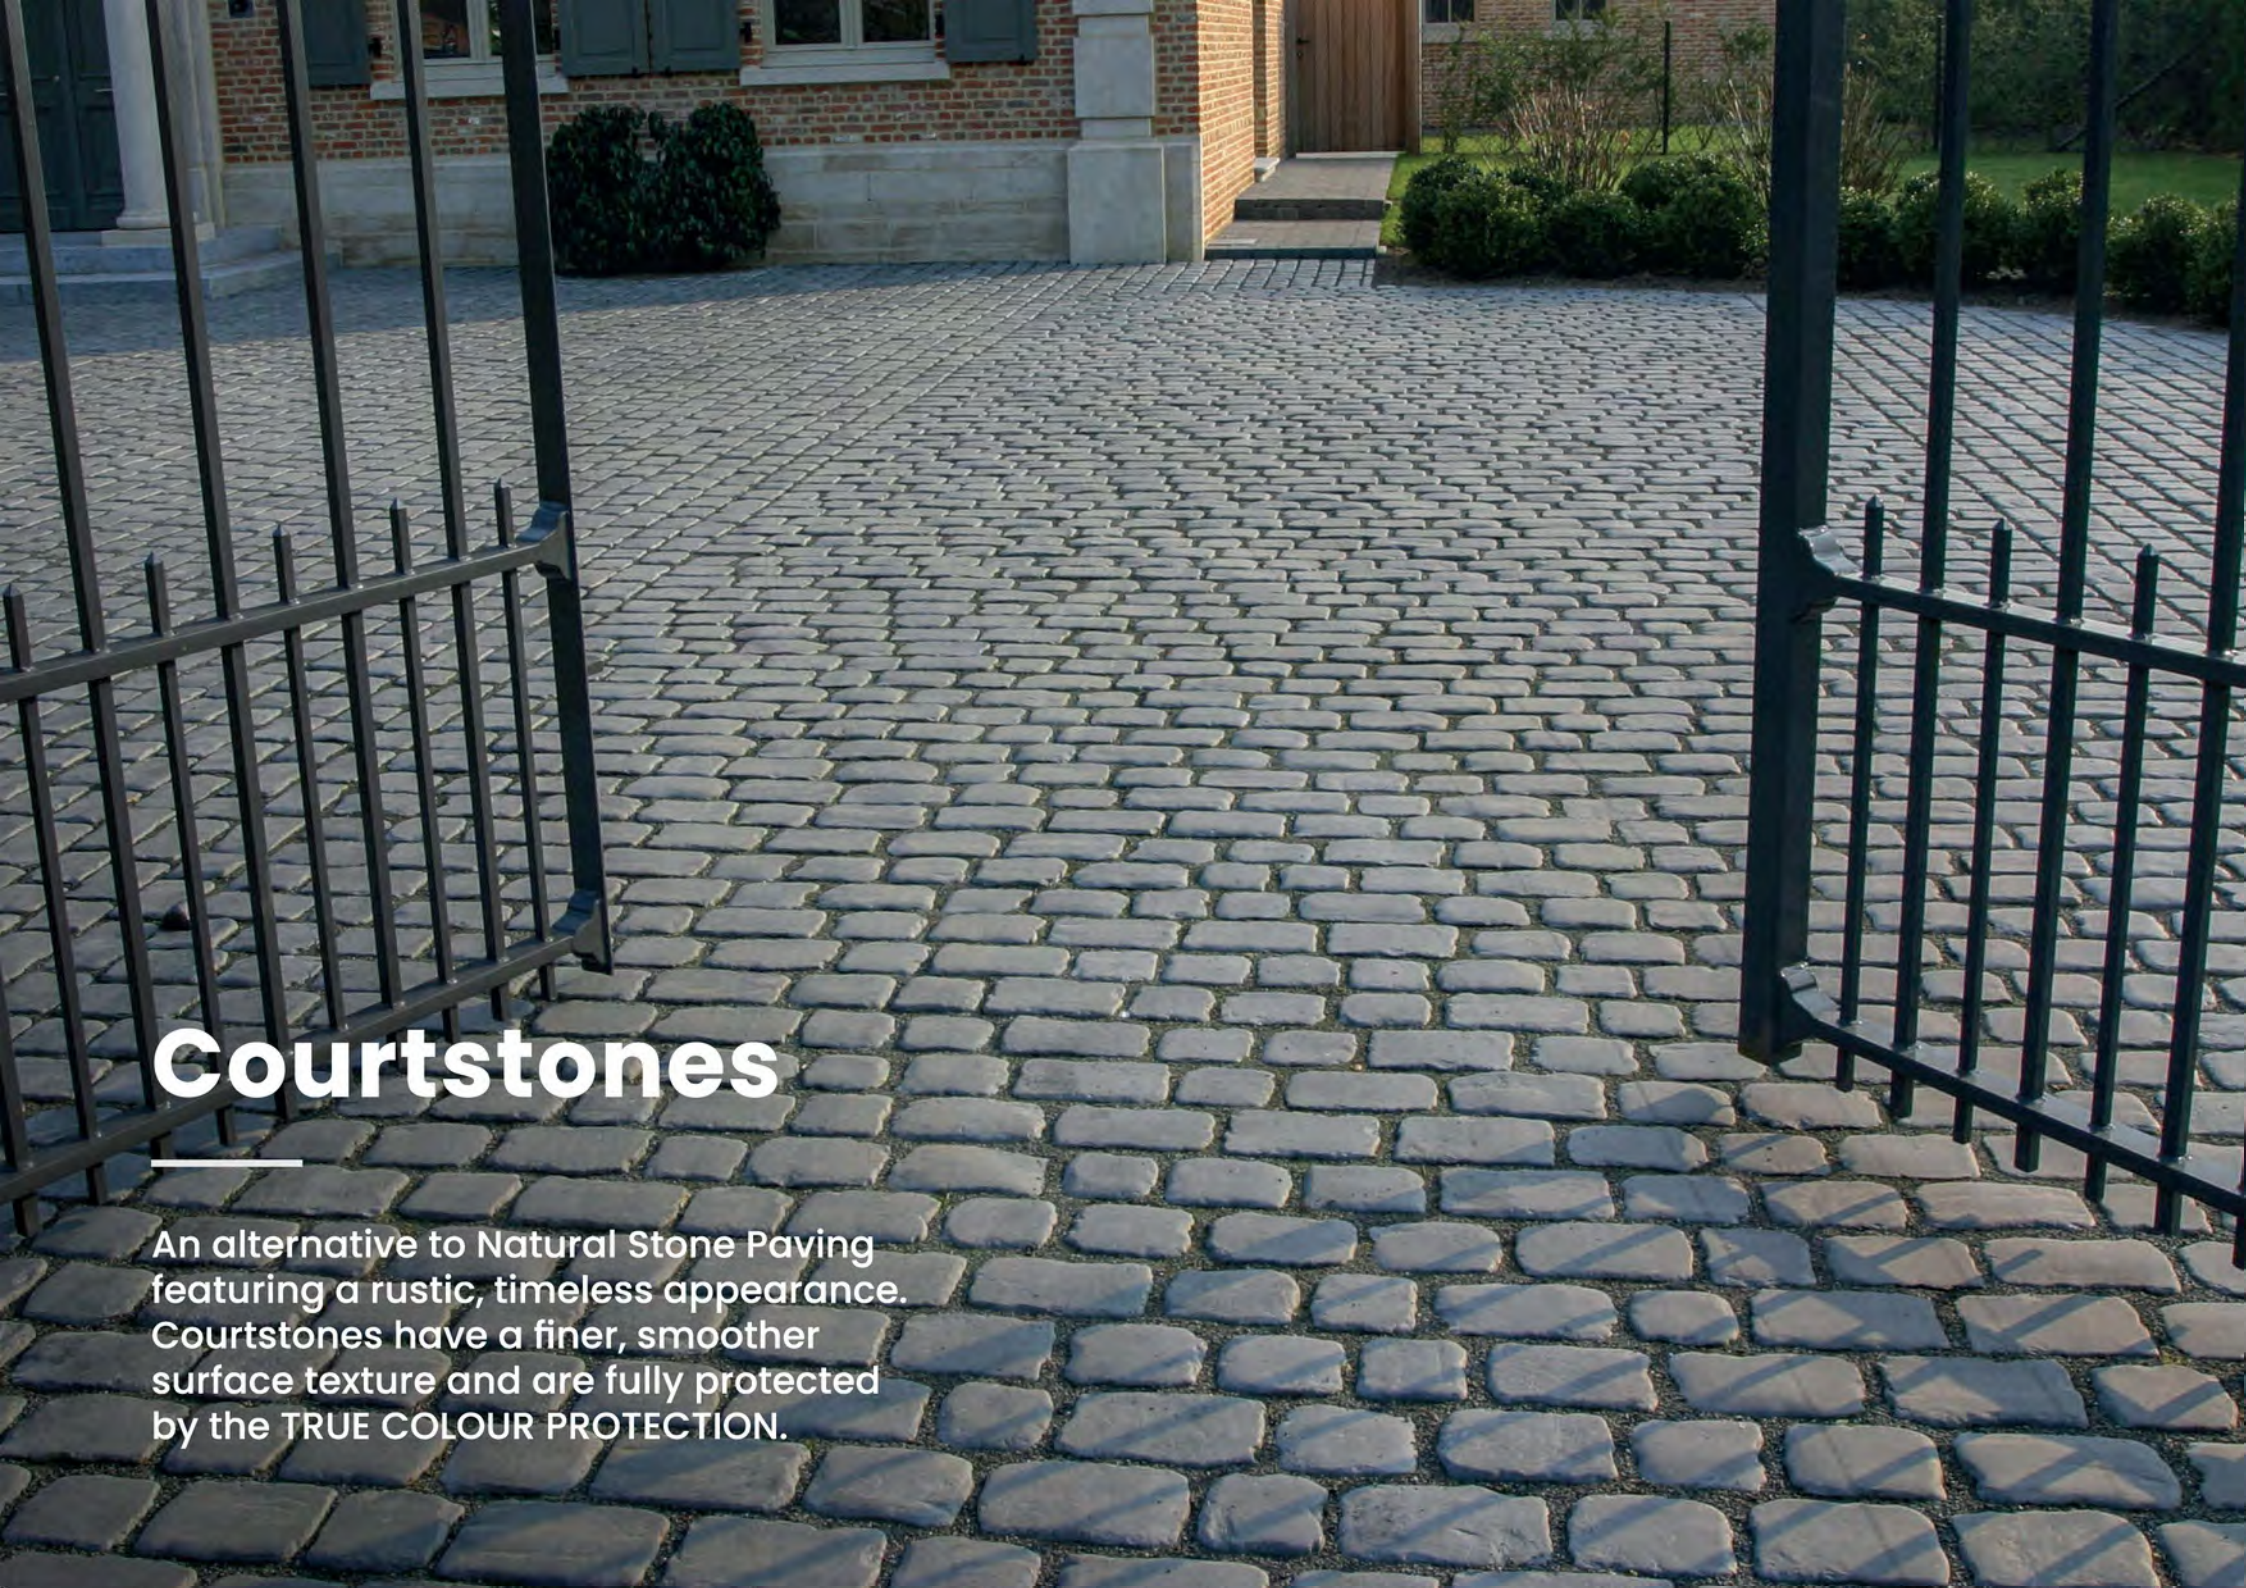

**Made to perform.
Designed to last.**

Designed for commercial environments, our paving solutions combine durability, contemporary aesthetics, and cost-effective long-term performance. Many products incorporate integrated surface protection to reduce staining, minimise maintenance, and maintain visual consistency over time.

The range includes paving slabs, block paving, and clay pavers in a variety of finishes to suit diverse architectural and performance requirements, from contemporary smooth surfaces to textured, slip-resistant finishes. Clay paving options provide exceptional strength, colour permanence, and a timeless appearance suited to high-traffic public and commercial spaces.

Roof terrace and balcony systems include pedestal-supported paving solutions that improve drainage, allow easy service access, and support efficient installation. Permeable paving options are also available to assist with sustainable drainage strategies and surface water management. Together, these systems provide a robust, specification-led paving solution that balances performance, safety, and design flexibility.

A photograph of a cobblestone driveway. The driveway is made of rectangular, light-colored stones laid in a pattern. A dark metal fence with vertical bars runs along the left and right sides of the driveway. In the background, there is a brick house with a wooden door and some greenery.

Courtstones

An alternative to Natural Stone Paving featuring a rustic, timeless appearance. Courtstones have a finer, smoother surface texture and are fully protected by the TRUE COLOUR PROTECTION.

A modern outdoor patio featuring dark grey stone paving with a distinctive lightly hammered finish. The patio is furnished with contemporary outdoor furniture, including a sofa, armchairs, and a coffee table, all with dark cushions and light-colored frames. The furniture is arranged on the dark grey paving. In the background, a large glass door opens up to a modern interior space. The patio is bordered by a light-colored wall on the left and a dark wall on the right. A large potted plant is visible on the right side of the patio. The overall atmosphere is one of modern elegance and outdoor living.

Natura

Crafted from authentic natural stone, this block paving range has a distinctive lightly hammered finish. It offers timeless elegance, lasting colour and is water-repellent.

A group of young adults are dancing and socializing on a rooftop terrace. The terrace is paved with large, dark grey rectangular tiles. In the background, there is a railing, some potted plants, and a view of a residential area with houses and trees. The scene is bright and sunny, with long shadows cast across the tiles. The people are dressed in casual, modern clothing. A man in a light blue shirt and pink pants is in the center, surrounded by others. A woman in a white shirt and grey skirt is in the foreground, dancing. A man in a green shirt and plaid shirt is also dancing. A woman in a yellow top is on the right. A man in a purple shirt is in the foreground, facing away from the camera. A small white table with drinks is visible in the background.

Cerasun

Cerasun is a premium ceramic paving system, featuring high-quality tiles permanently bonded to a stable concrete base with integrated spacer nibs for precise, efficient installation.

Cerasun Anima

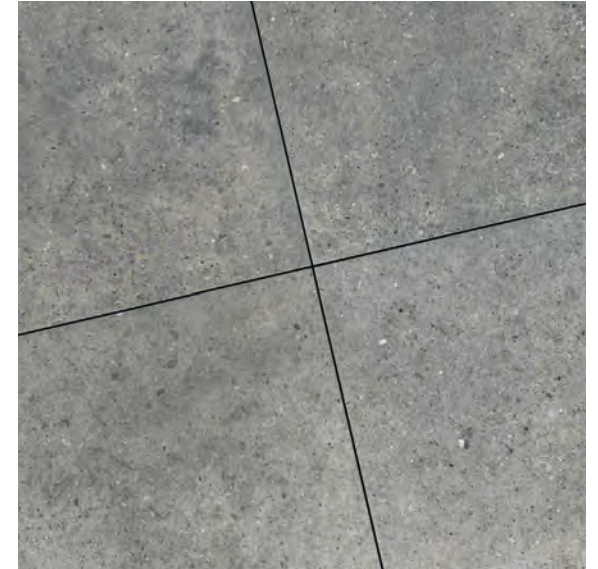

Available sizes
60 x 60 x 4cm

Quick to lay using standard bound or unbound methods (up to 150m²/day unbound), it offers architects superior stain and acid resistance, high slip/skid performance (R11-R12), and lasting UV/scratch resistance without needing mortar beds or backing slurries.

Available in an extensive range of sizes and colours, Cerasun is ideal for demanding applications including roof terraces where wind uplift resistance is essential.
